Experience

JavaScript Developer at Iodine.com Inc.

November 2013 – June 2014 (7 months)

We were working on 2 separate apps. The first one was portal full of information. And the second was form and statistics to improve client's knowledge about drugs.

New skills on the job:
Facebook React

Gulp task runner

Deployment process on CircleCI

JavaScript & PHP programmer at Devel.cz Lab s.r.o.

April 2012 – September 2013 (almost 2 years)

I worked as a PHP programmer and web developer on wikidi.com during my first 5 months. Since finishing that project, I've become a full-time JavaScript developer on flowreader.com.

New skills on the job:

Getting familiar with TDD

Feature branching

Deployment process / Builds

Scrum

Other Agile techniques

Making the perfect cup of coffee

PHP Programmer at RightClick s.r.o.

July 2011 – April 2012 (6 months)

During my time at [RightClick s.r.o.](http://RightClick.s.r.o.), I worked on an internal application that generates schedules for the Faculty of Philosophy at Charles University in Prague.

Main duties: Cooperation and creation of timeyou.com, a plugin for the payment gateway, PayPal, and Google Checkout.

PHP programmer at ALLIN1 s.r.o.

January 2011 – June 2011 (6 months)

I worked on the discount portal, Zapakatel.cz at [Allin1 s.r.o.](http://Allin1.s.r.o.) My main responsibility was building a liability calculator: dobrapojistka.cz.

Awesome new skills I gained:

Getting familiar OOP design patterns (e.g. MVC)

A deepened knowledge of frameworks, tools, and object-relational mapping (ORM)

First experience working in Linux

PHP programmer at DarkYork s.r.o.

October 2008 – December 2008 (9 months)

I developed a microsite, questionnaire, and guest list in PHP for [DarkYork](#).

Main claim to fame:

Outsourced for the project

Learned to meet deadlines

Freelance web developer

October 2007 – present

I am [available](#) as a freelance web developer. I build internet applications, mostly in PHP.
